

Supplementary Figure S1

Supplementary Figure Legend

Supplementary Figure S1. Effects of imatinib, vatalanib and paclitaxel on the growth of c-

Kit expressing human melanoma cell lines *in vitro*. The 451Lu (A), WM193B (B) and

WM1617 (C) melanoma cell lines were seeded into 12-well plates and cultured in the presence of

DMSO, 3 μ M imatinib, 1 μ M vatalanib or a combination of 3 μ M imatinib and 1 μ M vatalanib.

The cell growth was monitored by trypsinizing and counting cells. Results are presented as mean

+/- SEM. Statistical significance was evaluated using a one-way ANOVA followed by post-hoc

analysis applying the Duncan adjustment. Statistically significant difference ($p < 0.05$) to DMSO

(*) is indicated.
